- View Registered Users list
  Perform this request, to view all your registered users along with their email, username, credits, member group etc

  `http://your_dns:port/api.php?action=reg_user&sub=list`
- Add/Remove Credits
  Perform this request, to add or remove credits from a user

  `http://your_dns:port/api.php?action=reg_user&sub=credits&amount=X&id=X`
  The amount can be either positive or negative number. If you are trying to remove an amount of credits higher than the current credits of the user you will receive an error message (NOT ENOUGH CREDITS)
  The id, is the id of the user. You can also perform the same request using username parameter.
